

bold Business Account

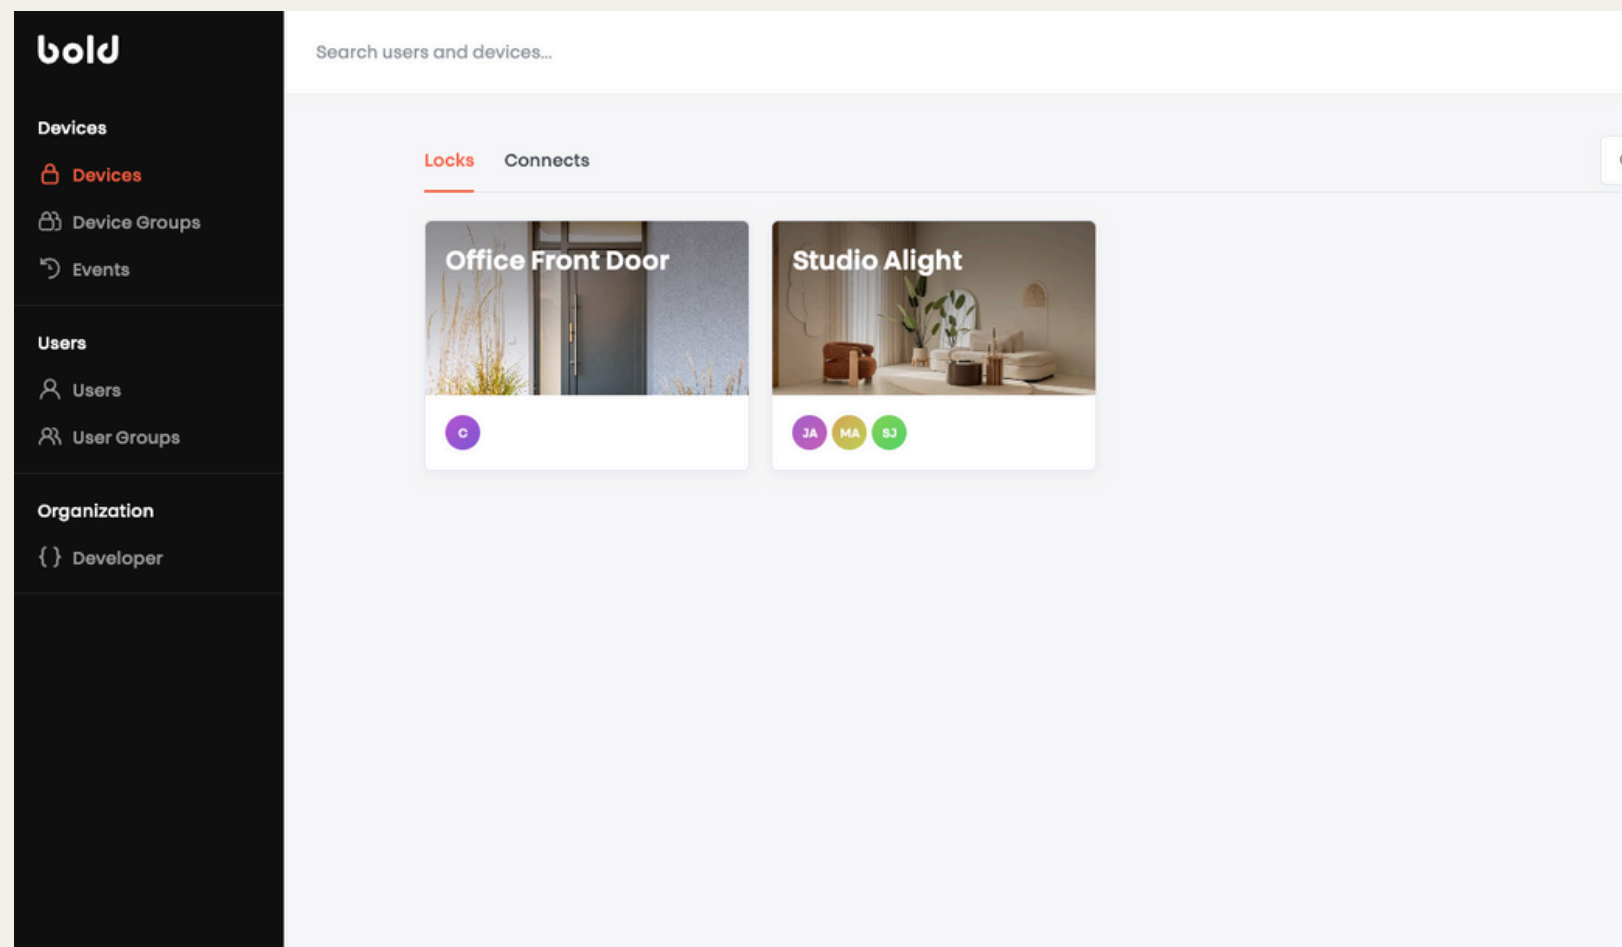

Smarter access. Built for scale.

Bold Business Account

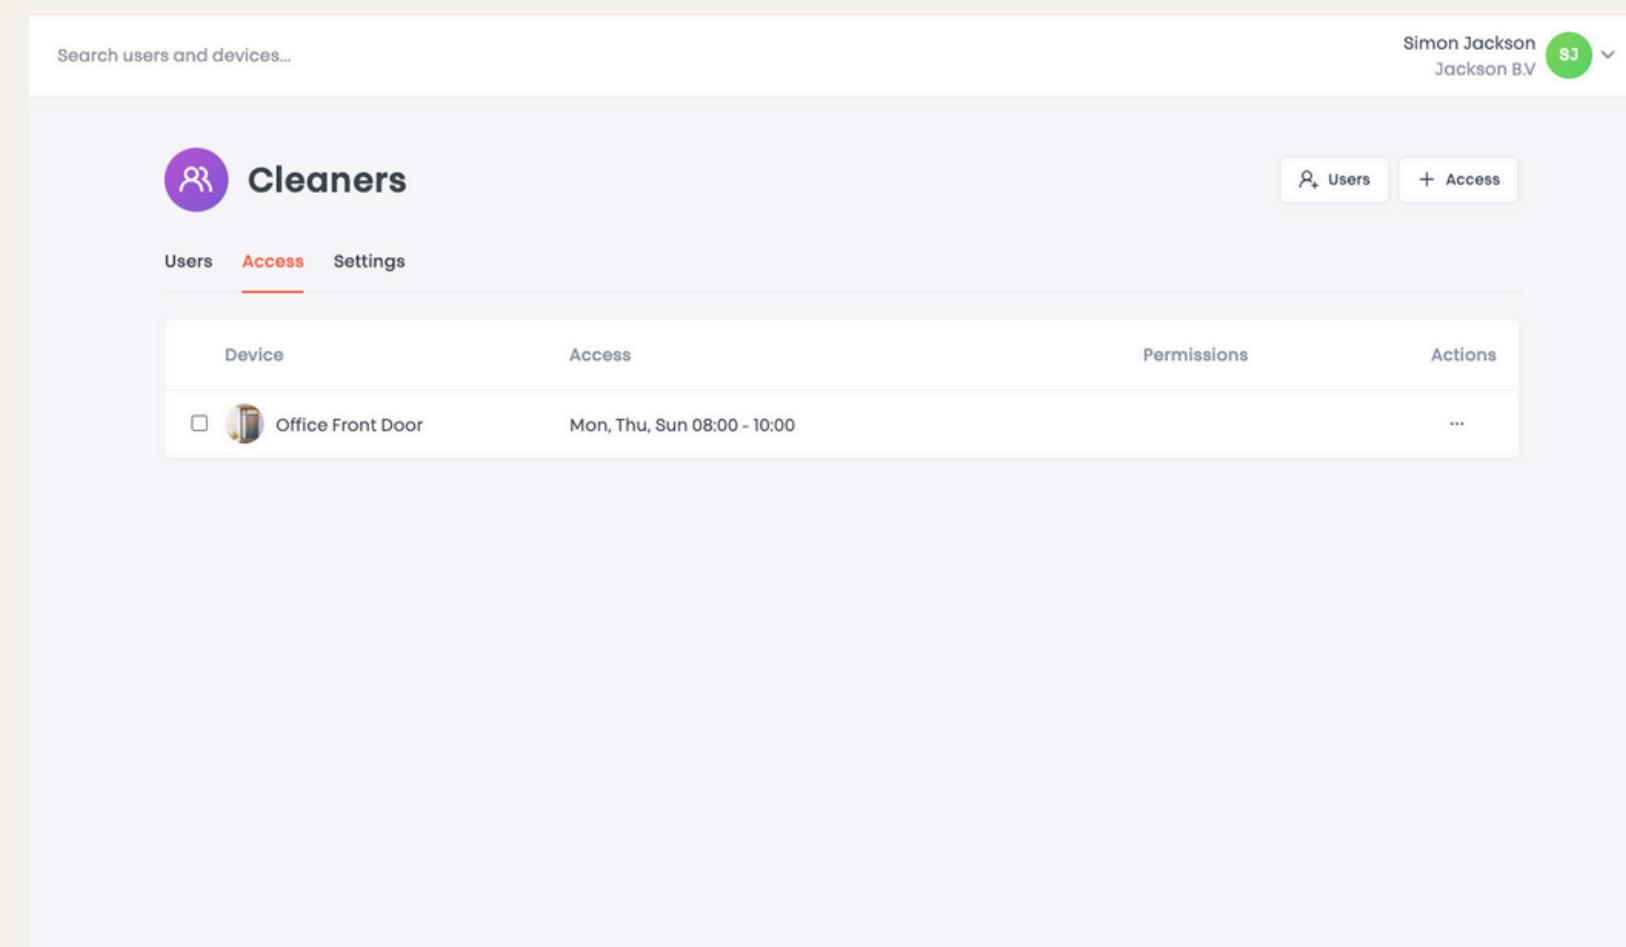

Bold Business Account is designed for organizations that manage smart locks across multiple users, teams, or locations. Whether you're operating vacation rentals, coworking spaces, commercial offices, or multi-unit buildings, this account gives you the tools to stay in control - without complexity.

This overview highlights key features that enhance your Bold experience - from grouping devices and users to sharing access without an app.

Web Portal access

Web Portal lets you manage everything directly from your browser, instead of relying on the app. It's built for business teams that want to be in control - wherever they are.

Assign access to user groups

Create user roles, lock groups, and define who gets access to what - down to the hour. Give your team permanent access, limit interns to weekdays, or send one-time access to a technician.

Extended event log

Business Account stores every access event for up to a year. You'll always be able to see who used which lock and when - no time limits, no missing data.

Device Groups

+ New Device Group

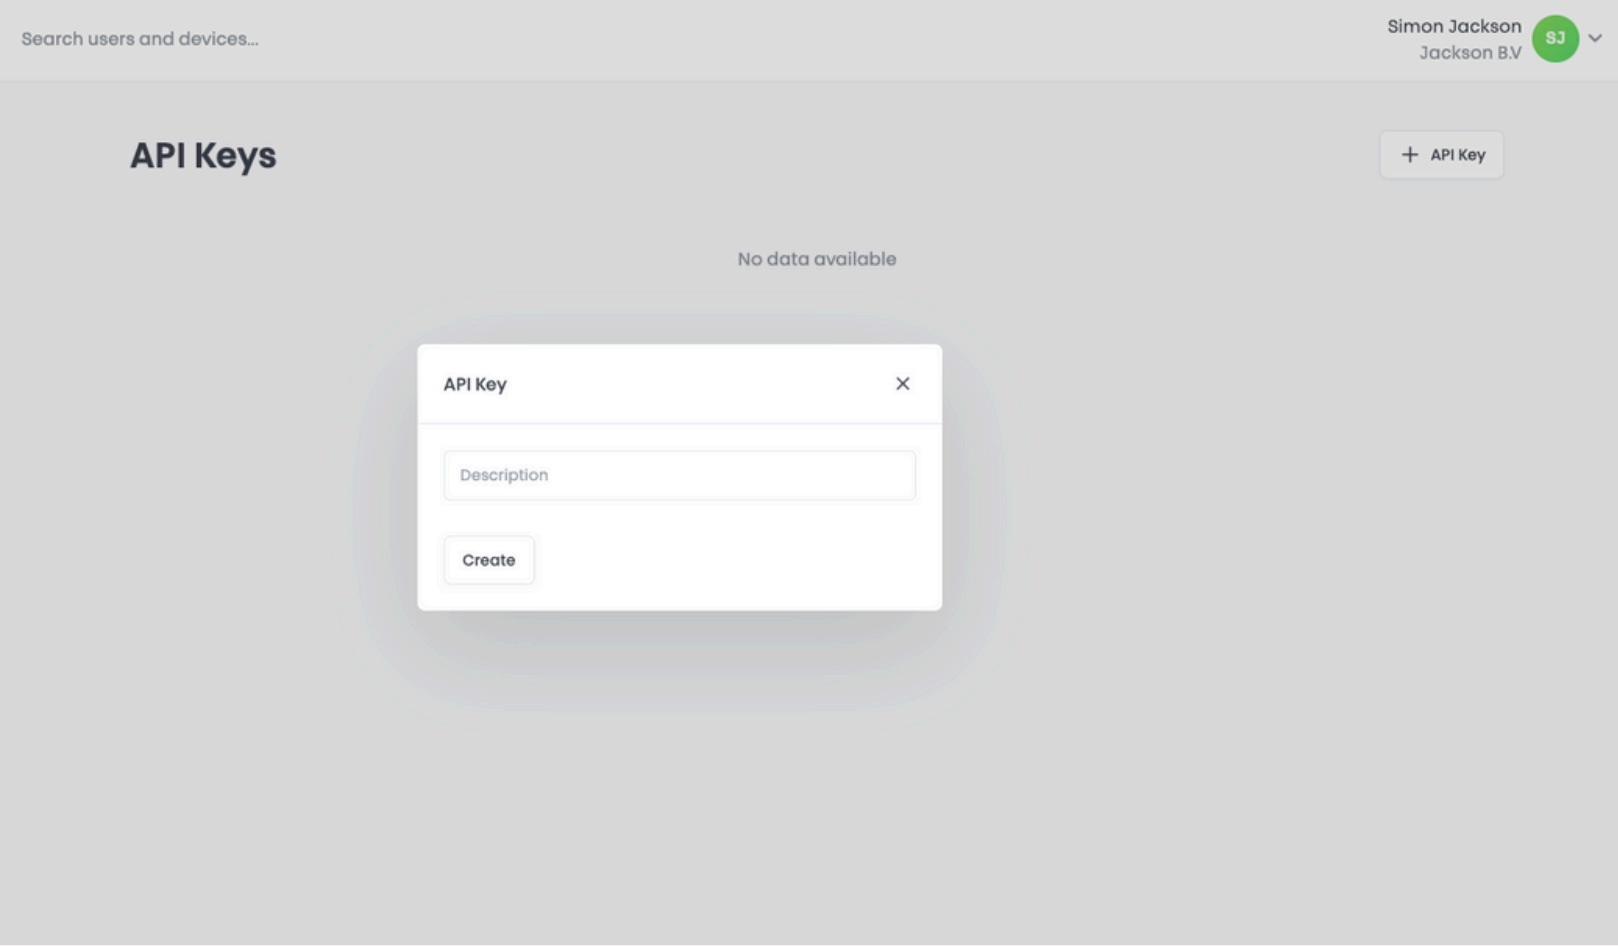

Name ▾

☐  Left wing Office

☐  Right wing Office

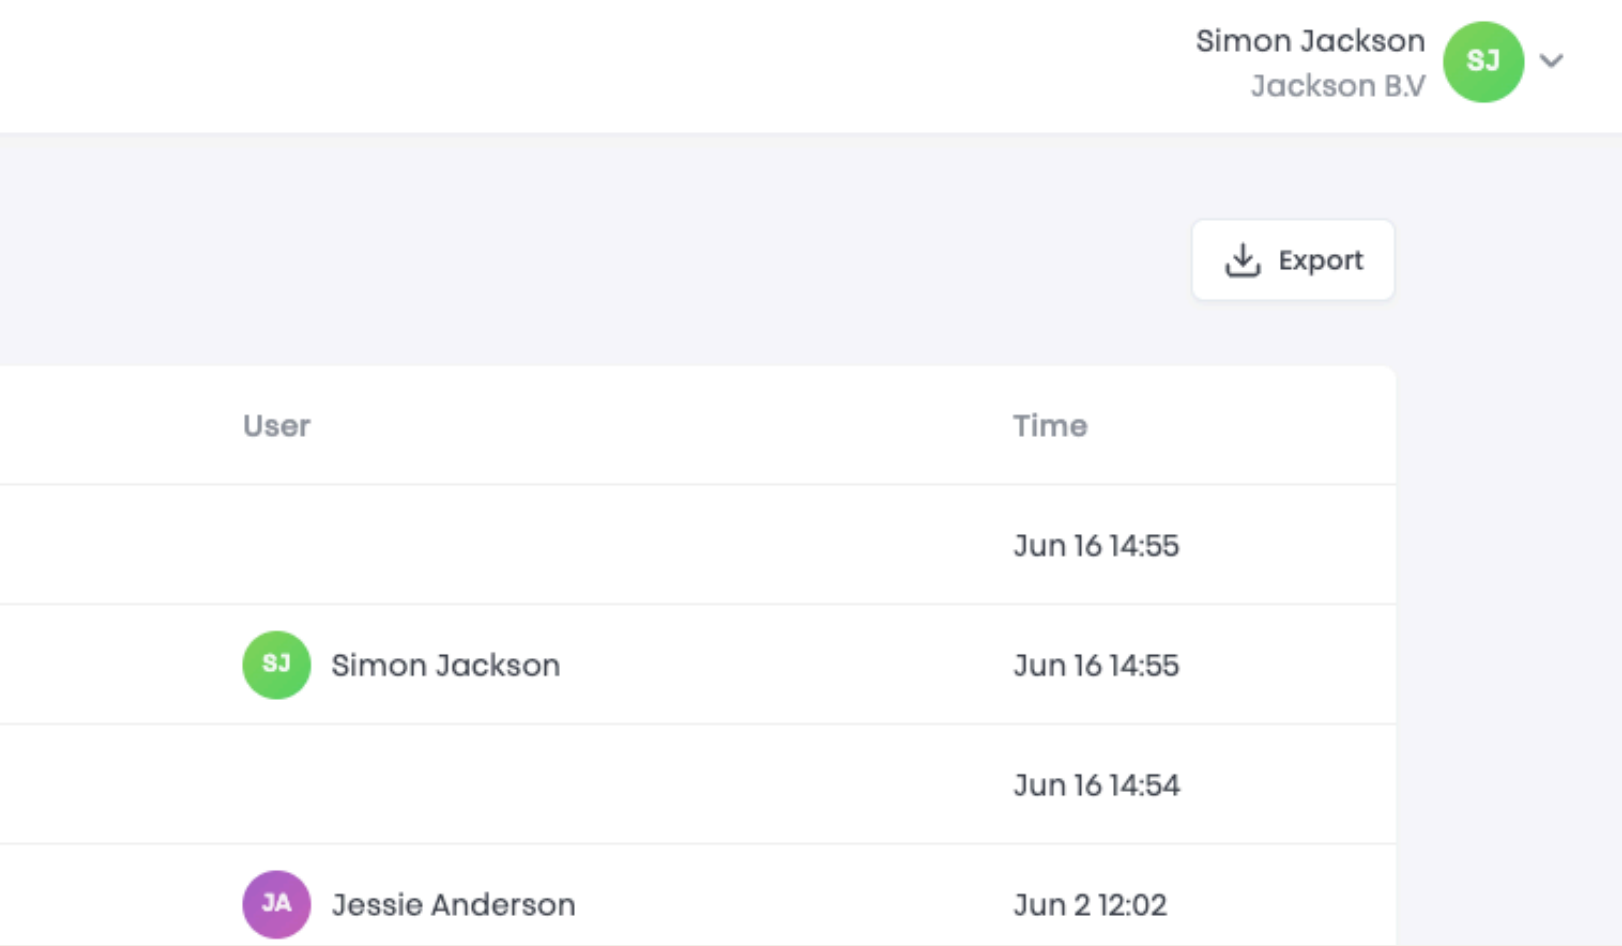

Device groups

Group your devices by any parameter that fits your operational needs - building section, department, etc. This feature gives you the flexibility to organize access at scale and maintain a clear overview.

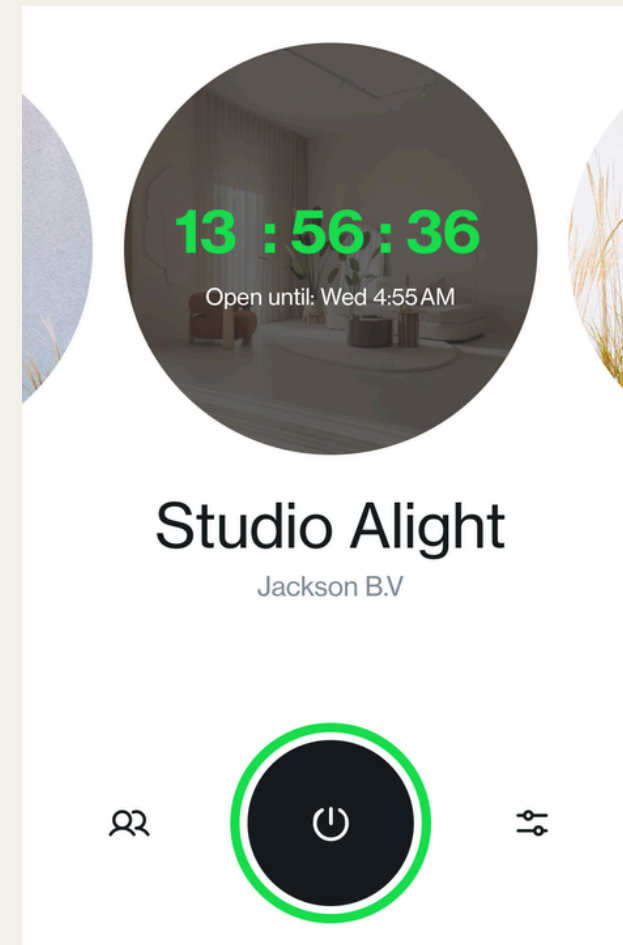

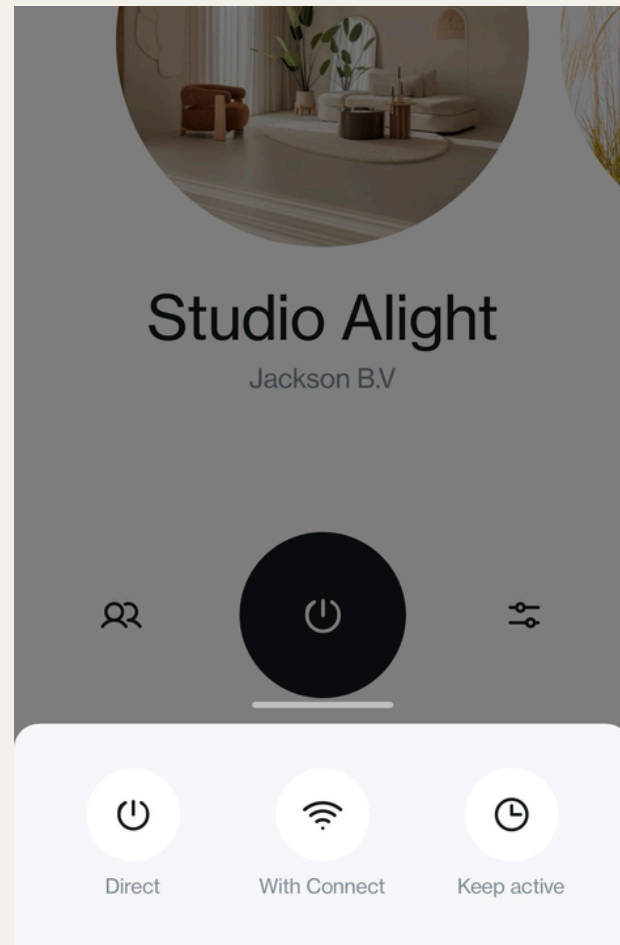

API access

Business Account includes access to Bold’s API. This opens the door to custom integrations with your own systems, giving you full flexibility to tailor Bold to your workflow.

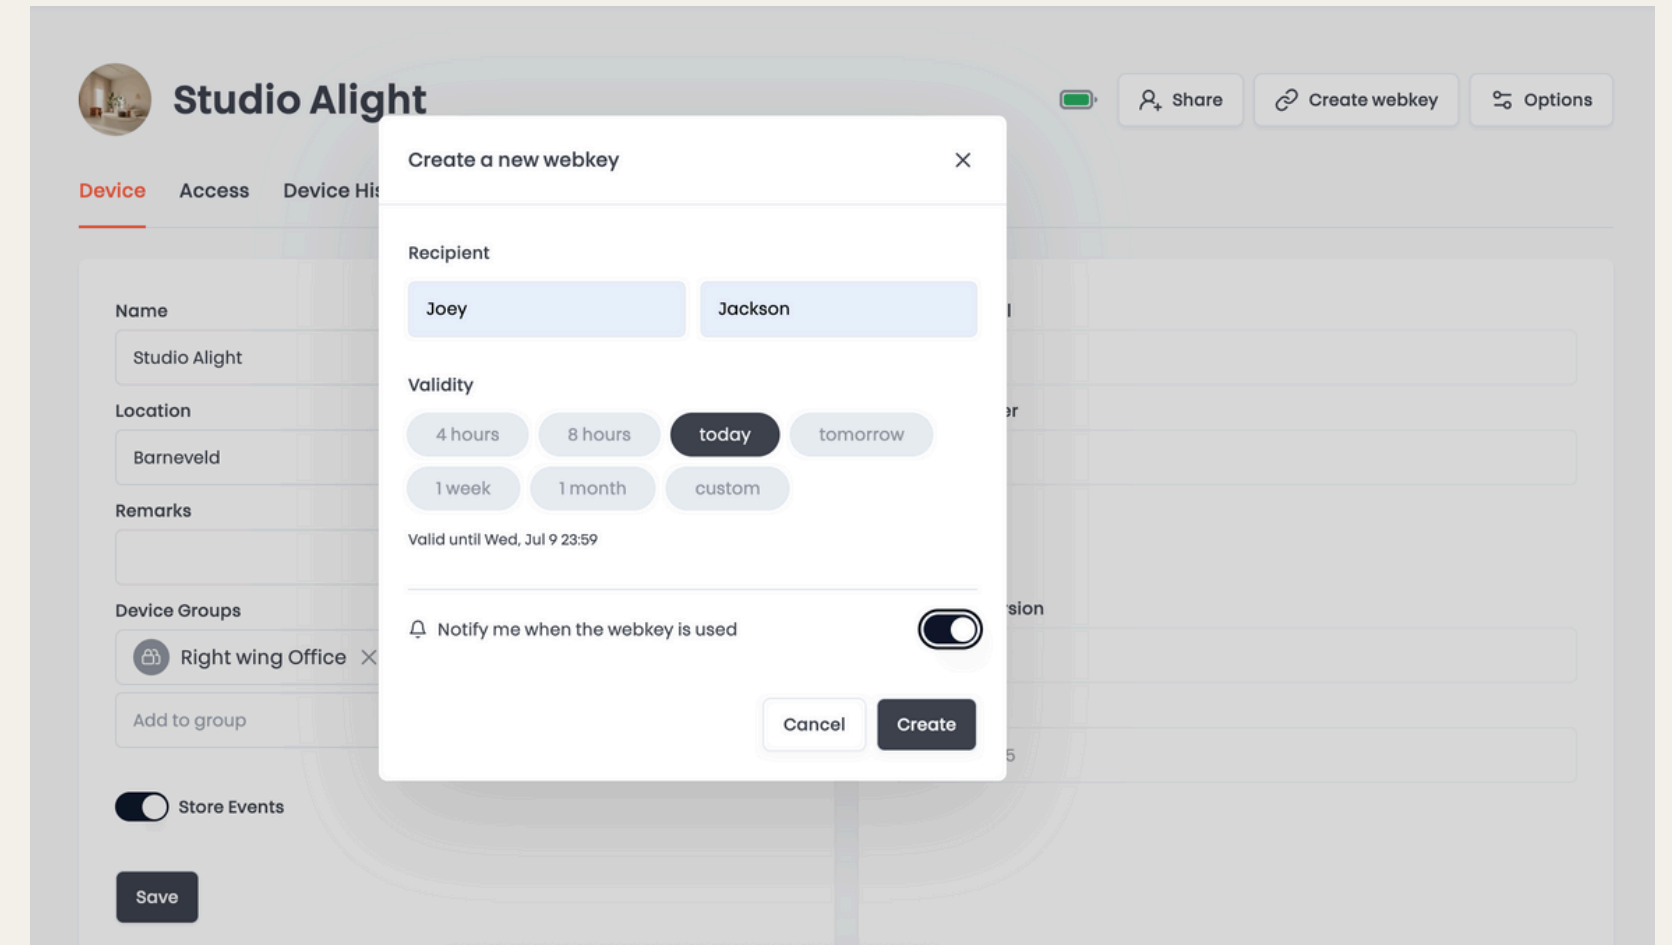

Export events history

Download a record of all lock activity. Useful for tracking usage across teams, reviewing specific time periods, or checking details in case of an issue.

'Keep Active' mode

Need the door to stay open during business hours? 'Keep Active' mode holds the lock open for up to 24 hours - so you don't have to unlock it each time. One tap, and it stays open until you say otherwise.

Enable Web Keys

Share access through a secure web link - no app required. Perfect for vacation rentals or temporary staff. Keep in mind: this feature requires a Bold Connect and must be enabled by Bold before it becomes available in your account.

Your orders

Order #88201 Order placed: June 10, 2025	View order → Download invoice →
	
1 item €22.99	✓ Shipped
