

A person's hand is visible in the upper left, typing on a laptop keyboard. In the background, a white computer mouse sits on a light-colored desk. In the foreground, a brown notebook with a black pen resting on it is visible. A small, round, silver button with a 'G' logo is placed on the notebook. A white text box with a drop shadow is overlaid on the left side of the image, containing the word 'bold' in large letters and a paragraph of text.

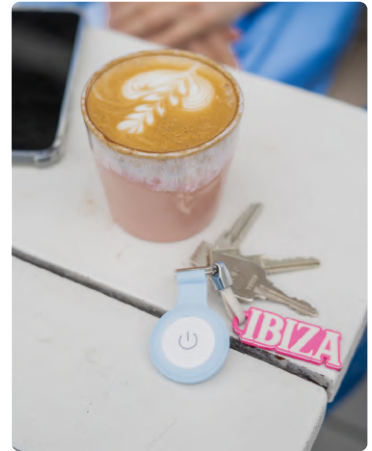

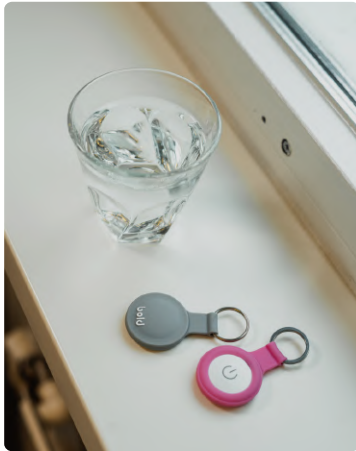

bold

Bold Clicker

No smartphone? No problem. With the Bold Clicker, you unlock your door with just one press of a button. Thanks to the built-in loop or the Clicker Case, you can attach it anywhere you like. Perfect for kids, older adults or anyone without a smartphone — fast, secure and super easy for everyone to use.

The Bold Clicker at a glance

- Click & go: Control up to 50 Bold Smart Locks with a single Clicker.
- Over 4 years of battery life for worry-free convenience.
- End-to-end encryption and two-factor authentication for maximum digital security.
- Stay in control: Lost your Clicker? Instantly block it via the Bold app.
- Only 35 mm small and 7 grams light — easy to carry anywhere.
- Access for everyone: Ideal for children, the elderly, and guests without a smartphone.

Specification Bold Clicker

mechanical specifications

product description

The Bold Clicker is a compact remote control for your Bold Smart Locks. Simply pair it via the Bold app and assign which locks the Clicker is allowed to operate. When used, the Clicker automatically searches for the nearest Bold lock nearby. If the correct access rights are recognised, the smart lock unlocks instantly.

housing

- No IP rating (Use the Bold Clicker Case for enhanced durability)
- Plastic body with metal key ring
- Green and red LEDs provide visual feedback
